Profile

Frontend Engineer | Full-Stack Experience | Security & Networking

I am a results-driven Full-Stack Engineer focused on building scalable, high-performance web applications with clean architecture and strong user experience. I specialize in modern frontend development using **React, Next.js, Angular, and Vue**, and I also build reliable backend systems with **Node.js and FastAPI**. I combine frontend engineering with solid knowledge of security and networking fundamentals, building applications with performance, maintainability, and safe data handling in mind. I have experience working with state management tools like **Redux**, modern styling systems like **Tailwind CSS**, and interactive web technologies such as **Three.js**. I enjoy solving complex problems, improving system performance, and delivering products that feel smooth, secure, and well-structured.

Education

Bachelor of Science in Computer and Information Systems,

[University of Uyo, akwa ibom state](#) 🌐

01/2023

Akwa-Ibom state,
Nigeria

Currently pursuing undergraduate studies in Computer and Information Systems, with a focus on software development, database management, and IT infrastructure. Gaining hands-on experience through academic projects, collaborative coursework, and continuous learning in emerging technologies.

Professional Experience

Front End Developer, Intern @KodeHauz Solutions Planet

- Built and maintained responsive web applications using React and Next.js
- Collaborated with team to implement UI features and fix bugs
- Contributed to codebase, improving performance and user experience

Skills

Front End Development — React, Next.js, JavaScript (ES6+), TypeScript (basic), HTML5, CSS3

Styling/UI — Tailwind CSS, Bootstrap, Responsive Design, Accessibility (A11y)

State & Data — Redux, Context API, React Query, Axios, REST APIs

Backend (Full-Stack) — Node.js, FastAPI, API Integration

3D/Animation — Three.js, GSAP

Networking & Security — Solid understanding of networking fundamentals and secure system design. | Experience implementing encryption concepts (including **RSA**) for secure client-server communication. | Security-aware development mindset, with practical knowledge of ethical hacking fundamentals and common web vulnerabilities.

Soft Skills — Problem Solving | Critical Thinking | Communication | Teamwork & Collaboration | Adaptability | Time Management | Attention to Detail | Willingness to Learn

Projects

Student Attendance and Grade Tracker

09/2025 – 10/2025

Developed a web-based application to monitor student attendance and academic performance. Implemented features for real-time data entry, automated grade calculations, and responsive UI using Tailwind CSS, and JavaScript.

Simple Blog Application – HTML, CSS, JavaScript

08/2025

- Built a basic blog platform as part of Web Development coursework - Implemented features like post creation, editing, and deletion using front-end technologies - Practiced responsive design and basic DOM manipulation - Strengthened understanding of client-side scripting and layout structuring

Portfolio Website — React / Tailwind CSS

06/2025

- Built a personal portfolio to showcase projects
- Implemented responsive layouts using Tailwind CSS
- Added animations and clean UI components
- Hosted on GitHub Pages/Netlify for easy viewing
